

GELFOAM

POWERFUL DEGREASER AND CLEANER FOR HEAVY DUTY FARM APPLICATIONS. FORMS A THICK LAYER OF HIGHLY ADHESIVE AND PENETRATING GEL/FOAM ON ALL SURFACES.

ADVANTAGES

- Makes thick foam or strong gel (depending on dilution rate) that sticks to vertical surfaces
- Stable and fully manageable when pre-mixed
- Outstanding wetting and penetrating power
- Efficient on animal, vegetable and mineral fats and oil residues
- Easy rinsing.
- Safe on plastic, glass and metals except copper, aluminium and light alloys
- Does not contain chlorine or potassium
- Unaffected by hard water
- Surfactant of natural origin

USES

- Especially effective when high degreasing action is needed, prior to disinfection
- Ideal for use with a foam gun.
- Use in farm premises for poultry, pig, cattle, horse, dairy
- Flues, smokers and generally for all food processing industries

INSTRUCTIONS FOR USE

- Dilute RS GELFOAM at 0.5%. Apply from bottom to top to dry, cool surfaces, away from the sun.
- Do not wet the surface before application. Allow time to act then rinse with high pressure.
- Always rinse the foam gun well after use.
- Use 0.5% for foaming. Increase concentration to achieve thick gel as required (up to 5% max).

CHARACTERISTICS

Liquid. Density: 1.16. pH pure: 14. Very soluble in water .

Suitable for food contact surfaces. Rinse after use.

SAFETY

Corrosive for skin and mucous membranes when pure. Hazardous : Read the Material Safety Data Sheet.
