

KICK-OFF

Product features sheet for

Pre-disinfection de-soiler

CHARACTERISTICS :

- clear liquid
- low foaming when sprayed; foams through a foaming lance
- pH 5 % : 6.6
- density 20 °C : 0.999 kg/l
- melting point : 2°C

COMPOSITION :

Based on fatty alcohol ethoxylate

DIRECTIONS FOR USE :

KICK-OFF has been developed especially for use as a food safe pre-disinfection cleaner to remove heavy soiling. It is compatible when applied sequentially or in mixture with **OXSAN** disinfectant.

1. Use **KICK-OFF** for general cleaning and washing down, before disinfection, in all animal housing, abattoirs, market areas, hatchers, trailers and vehicles, including bodywork and engines.
2. Use **KICK-OFF** diluted at 1 to 250 parts clean water (40ml in 10L)
3. Apply by pressure washer, knapsack or brush
4. Area coverage: 1 litre of solution will cover from 5 to 20 m²
5. Dispose of washings which may contain organic waste according to legal requirements

PACKING : 23L
