

Product Features Sheet for **OXYRINSE®**

What is it? *A unique peroxygen rinse water disinfecting treatment formulated from food grade components, stable at low concentrations to replace hypochlorite*

How is it used? *Add 1 part per 1000 parts of rinse water (1ml/L)*

What does it do? *Disinfects rinse water, breaking down into oxygen, water and carbon dioxide, without forming trihalomethane DBPs (disinfectant by-products), benefiting the environment and your slurry system. Causes NO taint or residues. Leaves your parlour smelling fresh.*

Do: *Measure your rinse water volume accurately, measure **OXYRINSE** precisely and achieve excellent results safely and economically. Flush spillage to drain with plenty of water. Observe safety requirements. File a Material Safety Data Sheet. Write this up in your risk assessment.*

Don't: *DO NOT mix with other products **ESPECIALLY CHLORINE**. Do not return product to the can or contaminate the can. Keep the lid on. Use a dispenser or a dedicated measuring jug.*

Pack sizes? *25 kg (22.3L) or 200kg (182L)*
