

# Red Teat Seal

## *Post milking barrier dip*

- forms a robust **physical barrier** on the teat
- highly **visible** red colour
- **persistent** film lasts until next milking
- dries to **non-sticky** coating; does not pick up debris
- **perfect coverage** of the teat surface with **economical** low rates of deposition
- **strong seal** of the teat orifice.
- **easily removable** with a wet cloth before the next milking
- designed for wet, **heavy soiling** conditions
- ideal teat protection for **dry cows**
- **no staining**
- may be used on **all milking animals** (cows, buffaloes, sheep, goats)
- thoroughly **tested** on a wide range of micro-organisms living and multiplying on the teat skin
- Bactericidal activity according to **EN1656 Standard**

### INSTRUCTIONS FOR USE

- apply immediately after milking
- always use a clean dip cup, filled to three-quarters full
- dip each teat. **DO NOT WIPE**
- Wash dip cup before the next milking
- before the next milking, clean the teats with a wet single use towel in order to remove any residue

### CHARACTERISTICS

Red flowing gel.      PH : 6.5.      Density : 0.98.      Active ingredient : Orthoxenol.      Biocide PT 3

### SAFETY

Do not mix with other products

Do not pour the contents left over in the **DIP CUP** back into the container

Store in the original packaging

Keep away from frost and strong light

For professional use only

Read the safety data sheet. Always use biocides safely. Always read labels and product information carefully before use.
